

Lincoln Accessories for Lubrication Systems

People, capabilities and systems to save resources and increase productivity

Industry leader

Continually satisfying our customers with the world's best lubrication equipment and pumping systems has made Lincoln the largest and most successful company in our field. For nearly a century, companies have relied on our technical and quality leadership; our world-class manufacturing and customer service, and our vast network of distributors and support facilities.

Research development

In order to provide the best worldwide and regional application solutions. Lincoln develops new products and systems at research and development facilities in the United States, Germany and India.

Providing solutions

Industrial customers in large processing plants, automotive manufacturing, pulp and paper mills, food and beverage and other manufacturing facilities can depend on solutions from Lincoln. For the toughest mobile applications, on the road or in the field, Lincoln protects heavy equipment used in mining, construction, agriculture and over-the-road trucking. In addition, Lincoln offers the best lubrication equipment to meet the needs of automotive service professionals.

Complete product line

Lincoln supplies automated lubrication systems, pumps and pump stations and top quality lubrication equipment and accessories. Our quality systems in the Czech Republic, Germany, India and United States are ISO 9001 registered. Additionally, our production sites in Czech Republic and Germany are ISO 14001 registered.

Worldwide support

With five technical support centers on three continents, and a network of distributors supported by regional sales and service offices, our customers can always draw on our worldwide resources.

Electronic Pressure Switch with Digital Display

This pressure switch is equipped with 1 digital display, 2 switching outputs and 1 analog output. The switching point can be adjusted via keys and can be used for pressures between 0 and 400 bar.

Part No.	Description
234-13194-4	electronic pressure switch

Technical Data

Input Data	
measuring range	0–400 bar (0–5800 psi)
overload pressure	600 bar (8700 psi)
burst pressure	300% full scale
Output Data	
accuracy	≥ 0,5% full scale
Analog Output	
signal	4 ... 20 mA, ohms resistance ≥ 500 Ω
Switching Output	
type	PNP-transistor output
switching current	max. 0,7A
life expectancy	≥ 20 million cycles
Other Data	
supply voltage	15 ... 30 VDC
hydraulic connection	G 1/4 male (BSPP)

Pressure Gauges, Lubricant Filters

Models

Part No.	Description
234-13101-1	0 – 600 bar pressure gauge, dia. 80 mm, G1/2 male (BSPP)
234-13101-2	0 – 600 bar pressure gauge, dia. 100 mm, R1/2 male (BSPT)
234-13101-4	0 – 600 bar pressure gauge, dia. 100 mm, glycol filled, G1/2 (BSPP)
234-13101-5	0 – 250 bar pressure gauge, dia. 100 mm BAR (R1/2)

These easy to service filters consist of a coarse strainer (410 micron) and a fine strainer (270 micron). They are pressure-

rated for 400 bar (5800 psi) and allow a flow rate of up to 24 liters/hour (6.3 US gal/hour).

Models

Part No.	Description
528-31341-3	filter block with R1/4 female (BSPT)
628-25531-2	filter block with R3/8 female (BSPT)
628-25709-1	double reversible filter block with R3/8 female (BSPT)

Lubricant filter unit galvanized and chromate-treated, with hydraulic lubrication fitting, for the filling of Quicklub pumps and for upstream

installation in divider valve lubrication systems, outlet connection 1/8" BSP.

Filter Block 628-25531-2

Models

Part No.	Description
528-36045-6	lubricant filter unit

The tube filter is an additional protection in application areas where there is contamination.

Solenoid Valves

Lincoln offers a variety of solenoid valves for grease, oil and air.

Lubricant Solenoid Valves

The depicted solenoid valves for grease (or oil) are specially designed to meet the tough requirements of grease lubrication applications.

With conventional valves, the grease has the tendency to harden within the valve, causing blockage.

Controllers

Controller for Single-line and Two-line Systems

part no.	664-36957-4
dimensions	75 x 160 x 75 mm
operating voltage	10 to 32 V DC
pause time	1 to 179 min
monitoring time	15 min

Display of high and low levels. For controlling and monitoring purposes pressure switches are required (minimum 1 pressure switch for single-line system, 2 pressure switches for two-line system).

Controller for Single-line and Two-line Systems

Universal Controller with Logic Relay

part no.	1SLO3-00000-00
dimensions	380 x 380 x 210 mm
application	small to medium-sized systems (two-line systems, progressive systems, spray lubrication systems)
input voltage	230 VAC (other voltages available)
inputs	8, two of which may be used analogously
outputs	4

Display and operator keypad (under transparent protection cover), integrated tact generator and counter.

Universal Controller with Logic Relay

Universal Controller with SPS & Text Display

part no.	1SS73-00000-00
dimensions	380 x 380 x 210 mm
application	Medium-size and large systems (two-line systems, progressive systems, spray lubrication systems)
input voltage	230 VAC (other voltages available)
inputs	14, also available with analog inputs
outputs	10
text display	2 lines with 20 characters each

Standard with up to 6 monitored progressive divider valves or nozzles; up to 4 monitored two-line metering devices

Universal Controller with SPS & Text Displays

Universal Controller with Compact SPS

part no.	1SC74-00000-00
dimensions	380 x 380 x 210 mm
application	medium and large-sized systems with a lot of monitoring locations (two-line systems, progressive systems, spray lubrication systems)
input voltage	400 VAC (other voltages available)
inputs	16
outputs	16
text display	2 lines with 20 characters each

Complete unit with display (2 lines with 20 characters each) and ASI-bus expansion module available up to 124 inputs and 124 outputs Standard with up to 12 monitored progressive divider valves or nozzles; up to 10 monitored two-line metering devices

Universal Controller with Compact SPS

Hoses, Tubes and Fittings

All necessary tubing, hoses, fittings and fastening material are available to meet your system requirements.

Tubes are available in several sizes and materials ranging from steel, stainless steel, and copper to plastic (PA). To save your time when installing your own systems, plastic tubes are even available pre-filled with grease.

Fittings are also available in several sizes, materials and series (light to heavy). For easy installation, we have special Quicklinc push-in type fittings that can be used with plastic tubes.

These fittings are used to reduce from one size of tubing to a smaller size. KOR/RED fittings must be used in conjunction with the larger size G or T fittings. E.g. to reduce from 20 to 10 mm tube, use a G20-S and a RED20/10-S.

Quicklinc, Push-in Type

Installing lubrication systems can take a lot of time, especially when there's not much space to work with. Those problems are a thing of the past with Quicklinc „push-in“ fittings. Great for hard-to-reach places, Quicklinc can cut the time it takes to install line connections in half – or more – when compared to screw-type connectors, which require the assembly of four components.

Quicklinc fittings from Lincoln are designed for high pressure, withstanding up to 350 bar (reinforced collar version). They are used primarily in progressive systems from the pump to the main metering device (reinforced collar version) and from the main to secondary metering devices or lube points (knurled collar version).

Note: M = metric, R = BSPT, G = GSPP, K = conical

The Power of Knowledge Engineering

Drawing on five areas of competence and application-specific expertise amassed over more than 100 years, SKF brings innovative solutions to OEMs and production facilities in every major industry worldwide. These five competence areas include bearings and units, seals, lubrication systems, mechatronics (combining mechanics and electronics into intelligent systems), and a wide range of services, from 3-D computer modelling to advanced condition monitoring and reliability and asset management systems. A global presence provides SKF customers uniform quality standards and worldwide product availability.

Important information on product usage

All products from Lincoln may be used only for their intended purpose as described in this brochure and in any instructions. If operating instructions are supplied with the products, they must be read and followed.

Not all lubricants are suitable for use in centralized lubrication systems. Lincoln does offer an inspection service to test customer supplied lubricant to determine if it can be used in a centralized system. Lincoln lubrication systems or their components are not approved for use with gases, liquefied gases, pressurized gases in solution and fluids with a vapor pressure exceeding normal atmospheric pressure (1 013 mbar) by more than 0,5 bar at their maximum permissible temperature.

Hazardous materials of any kind, especially the materials classified as hazardous by European Community Directive EC 67/548/EEC, Article 2, Par. 2, may not be used to fill SKF centralized lubrication systems and components and delivered and/or distributed with the same.
